

Presentation of the speaker

Julio Castro

Global Regulatory Director at Iberdrola

Mr. Julio Castro started his career at Red Eléctrica (Power System Operator) in 1991 where he was responsible for telecontrol, power system analysis and operation of the high voltage network, in the Dispatching Centre in the north of Spain.

In 1998 he joined Iberdrola as analyst in the Strategic Planning Area. In 2001 he was appointed Gas Logistics Director, responsible for maritime transportation and access to the grids (TPA, new regas terminals and pipelines like Medgaz).

He also served as Vice President responsible for gas trading and shipping on a global basis within the company, gas business Chairman in the US and Canada, board member of Iberdrola Energy USA, Iberdrola Canada Energy Services, Enstor, Medgaz and Iberian Gas Hub, and Vice Chairman of the Spanish Gas Association (Sedigas).

Currently he is Chief Regulatory Officer of Iberdrola Group.

Julio Castro graduated as a nuclear engineer from the School of Engineering of Bilbao. He has a MBA from IESE-Madrid and a Degree in Maritime Business from IME-Madrid.
