E-Mobility: Insights from an E.ON Perspective

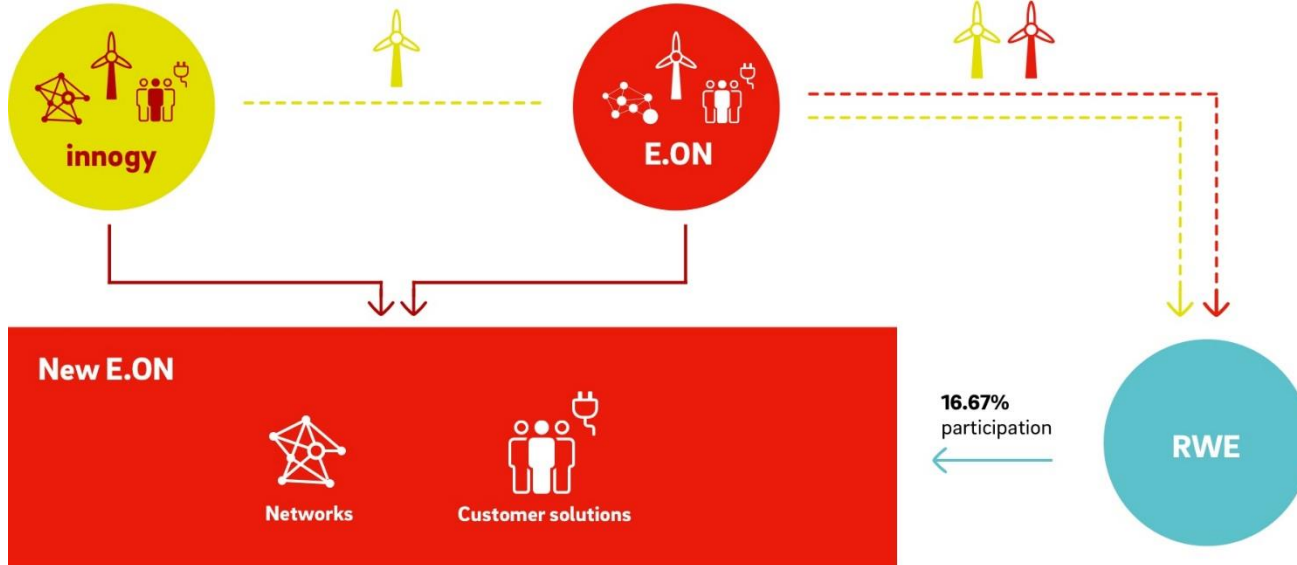

24 September 2018, Brussels

E.ON is already today shaping the future of energy – and mobility

What's Next: E.ON to Focus on Networks and Customers

E.ON will be transformed into a provider of European energy networks and state-of-the-art customer solutions, ideally positioned to drive Europe's energy transition by innovation.

Enabling E-Mobility across Europe

e-on
Drive

Own network
of 3,000 public
charge points
and access to
16,000 further
public chargers

Building a
Europe-wide
ultra fast
charging
network

Enabling
traditional and
novel
sustainable
mobility
solutions

Drive

New
sustainable E-
Mobility
solutions

- Economical
- Ecological
- Social

@E.ON HQ:
32.000 km
driven in 10
months

4t CO₂ saved

Costs of
mobility
reduced by 65%

The decarbonization of the transport sector requires targeted policy support

- Ambitious CO2 reductions standards for cars and vans
- Data exchange to be enabled
- Legal base to be clarified
- Financial support to be expanded
