

March 2025 Edition

EEF Agenda for 2025

Dinner- Debate

Powering together: Public acceptance for RES and clean transition projects Tuesday 18 March | EP Brussels

Our EEF Associate Members **Fortum**, **PPC** and **Euroheat & Power** will share practical examples of how public acceptance is key to advancing the clean energy transition—driving support for electrification, renewable energy, and decarbonizing heating and cooling. We are very keen on hearing diverse perspectives on this relevant topic!

Working breakfast
**ITAC Industrial and Technical
Advisory Committee**
Tuesday 25 March | EP Brussels

The Industrial and Technical Advisory Committee (ITAC) is the official consultative meeting meant for an exchange of views between the Board of the EEF, the Associate Members and the Secretariat.

EEF Past events

Briefing on Energy
**Going back to basics: Energy Intensive
Industries**
Thursday 6 March | EP Brussels

Speakers from various EEF Associate Members shared detailed insights into the workings of industries such as steel, fertilizers, aluminium, copper, chemicals, cement, paper and pulp. They explored how each of these industries uses energy, the challenges they face, and the opportunities for improving energy efficiency as well as the potential for recycling in each sector—how materials can be reused or repurposed in different ways to reduce environmental impact and improve circularity. A special thank you to the MEPs for their contributions, and grateful to all speakers and participants - We're already looking forward to the next session.

Dinner- Debate

What place for CCUS in a competitive EU energy transition?

Tuesday 11 March | EP Strasbourg

Our speakers from Eni, Snam, TotalEnergies, and Uniper shared a value chain approach on CCUS projects recently inaugurated and under development, emphasizing their role in balancing emissions reduction, economic competitiveness, and industrial innovation. The discussion explored both the opportunities and challenges of integrating CCUS into Europe's evolving energy landscape and showcased that European companies have the technology both for their processes and for helping others – such as the hard to abate industry - to achieve reduction goals.

Eurogas Annual Regional Conference **Heat Pumps: Competitive Clean Tech for all Europeans**

29 April 2025 – Tallinn, Estonia

It is with great excitement that Eurogas invites you to a new edition of the Annual Regional Conference, the event bringing together European and national policymakers and thought leaders to discuss the latest developments and challenges of the gas sector from a regional perspective. This year the event will take place in Estonia (Tallinn) on 29 April, shedding a light on the state of play of the Estonian gas market and the potential for renewable and low-carbon gases in the Baltic region. The event (in English) is organised with the kind support of Estonian Gas Association, and will be followed by a networking lunch on premises.
